Diploma in Turner

Turner is a two-year vocational trade in mechanical engineering where the students are introduced to a variety of topics such as steps to manufacture and assemble metal components for the construction of tools, machine components, and industrial machinery. This two-year vocational trade course is divided into four semesters of six months each. There are government and private Industrial Training Institutions (ITIs) in the country that offers this course.

After completing studies, the students are hired by both Public and Private sector organisations and due to the hike in their demand, they are offered a pretty good salary as well. Here is all regarding the ITI turner course one needs to know.

ITI Turner Subjects and Syllabus

Trade Theory

Trade Practical

Workshop calculation and science
